### NOTES TO USERS

For information and questions about this map, available products associated with this FEMA including historic versions of the FIRI, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information exchange at 1-877-336-2672 or visit the FEMA Map Service Center website at <http://msc.fema.gov>. Available products may include previously revised Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or utilized directly from the website. Users may determine the current map date for each FIRI panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information exchange.

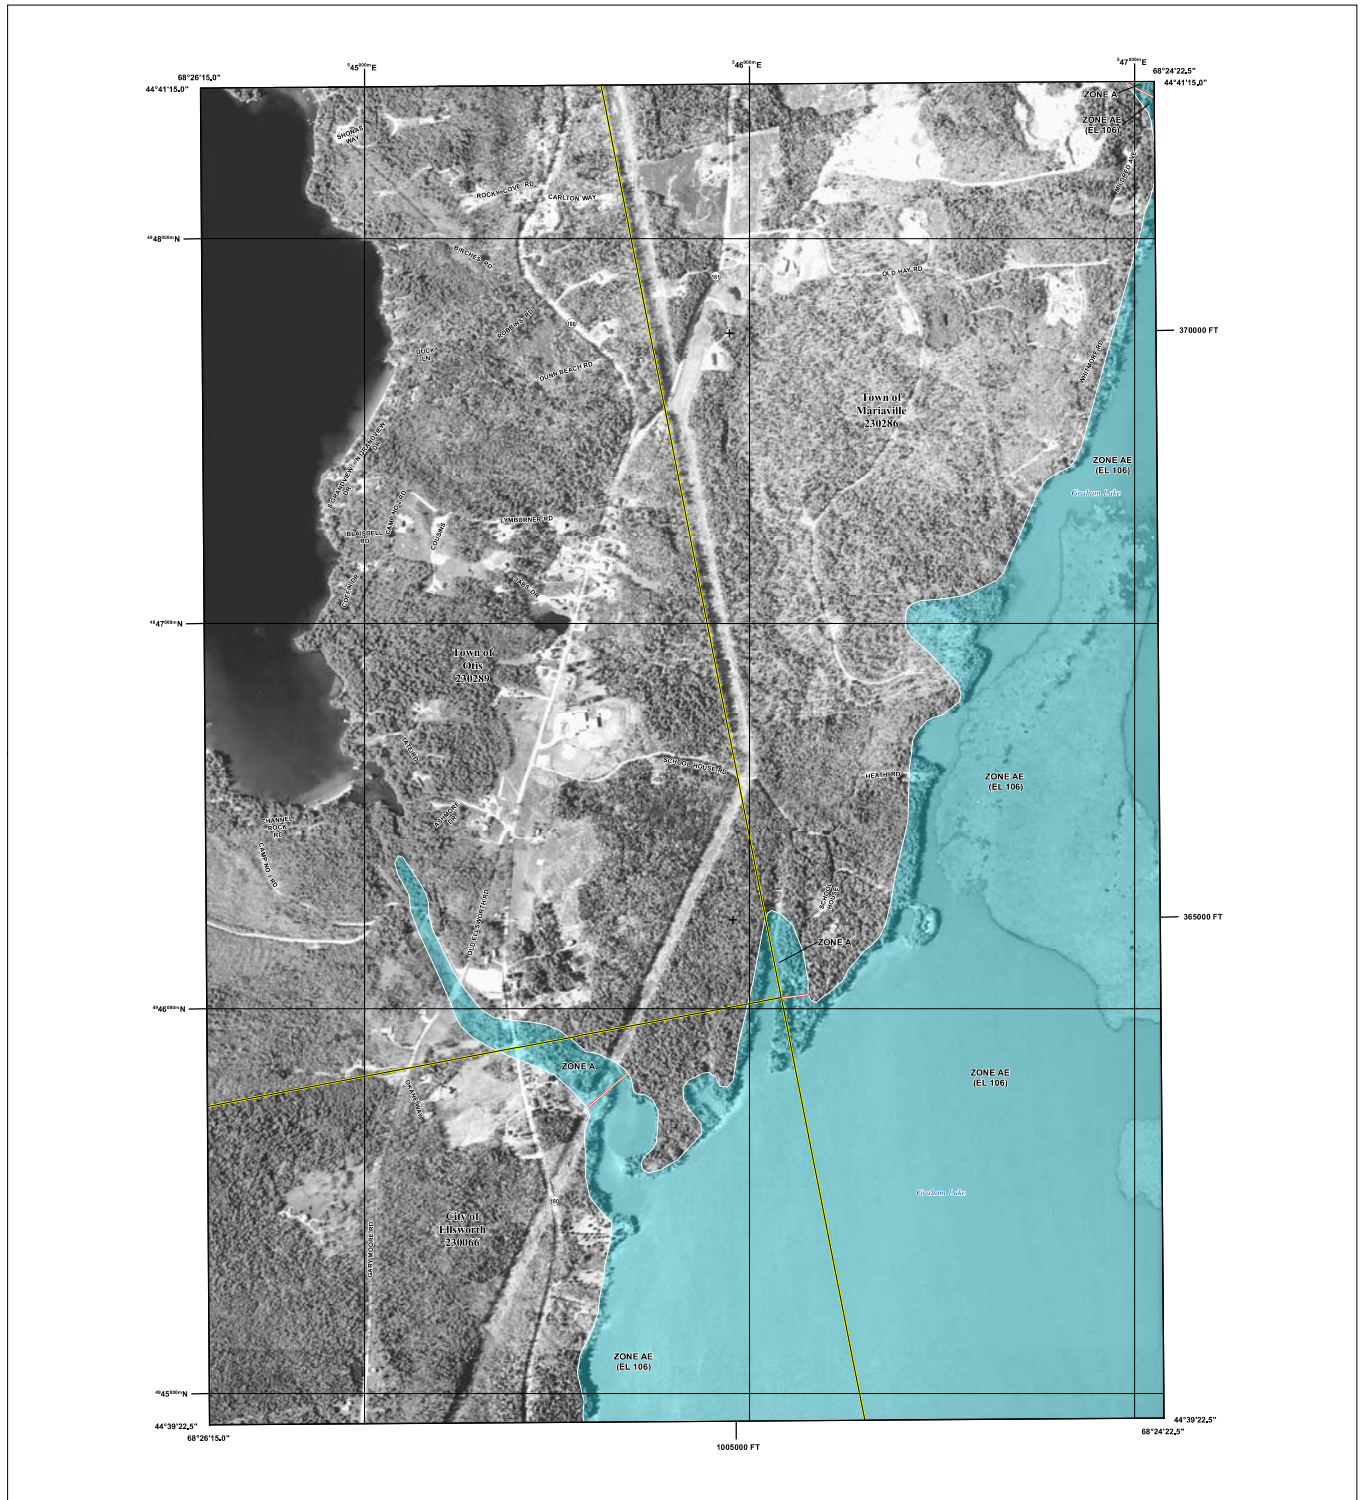

Communities assessing land on adjacent FIRI panels must obtain a current copy of the adjacent panel as well as the current FIRI data. These may be obtained directly from the Map Service Center at the number listed above.

For community and countywide map dates refer to the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-368-5627.

Base map information shown on this FIRI was derived from digital orthophotography. Data were provided in digital format by Maine Office of GIS (MEGIS). Orthorectification was acquired between 2003 and 2005 at a resolution of 1" and 24-cm size.

Only coastal structures that are certified to provide protection from the "superintended coastal flood hazard analysis" are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FIRI database in S-1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, # NOTES TO USERS

For information and questions about this map, available products associated with this FIRM including historic versions of the FIRM, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information Exchange at 1-877-FEMA-MAP (1-877-368-2677) or visit the FEMA Map Service Center website at <http://msc.fema.gov>. Available products may include previously revised Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or obtained directly from the website. Users may determine the current map date for each FIRM panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information Exchange.

Communities assessing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM data. These may be obtained directly from the Map Service Center at the number listed above.

For community and countywide map dates refer to the Flood Insurance Study report for this jurisdiction.

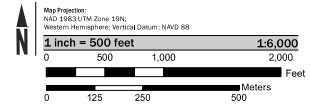

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-456-2832.

Base map information shown on this FIRM was derived from digital orthophotography. Data were provided in digital format by Maine Office of GIS (MEOGIS). Orthorectification was acquired between 2003 and 2005 at a resolution of 1" and 240 call lines.

Only coastal structures that are certified to provide protection from the hyperconcentrated storm surge are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FIRM database in 5' contour.

State of Maine Floodway Note: Under the Maine Floodway Statistics Act (M.R.S.A. Title 36 § 436A, PC) the Floodway is not designated on the Flood Insurance Rate Map; the Floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the Floodway, as measured from the normal high water mark to the upland limit of the Floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual Floodway based upon approved FEMA mapping methods.

For community and countywide map date refer to the Flood Insurance Study report for this jurisdiction.

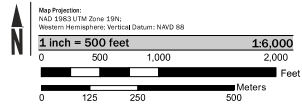

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-368-5848.

Base map information shown on this FIRM was derived from digital orthophotography. Data were provided in digital format by the Maine Office of GIS (MEOGIS). Orthorectification was acquired between 2003 and 2005 at a resolution of 1 inch = 240 feet.

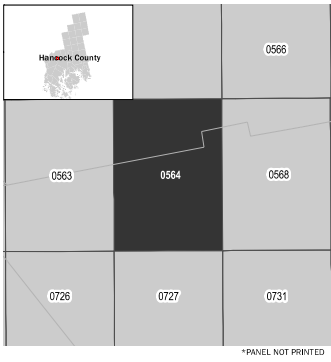

Only coastal structures that are certified to provide protection from the hyperinundated coastal flood are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FIRM database in 1:50,000 scale.

State of Maine Floodway Note: Under the Maine Floodway Statutes Annotated (M.A.S.A.) Title 38 § 436A, 7C where the floodway is not designated on the Flood Insurance Rate Map, the floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the floodway, as measured from the normal high water mark to the upland limit of the floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved FEMA mapping methods.

For information and questions about this map, available products associated with this FEMA including historic versions of the FEMA, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information Exchange at 1-877-FEMA-MAP (1-877-368-2627) or visit the FEMA Map Service Center website at <http://msc.fema.gov>. Available products may include previously issued Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or utilized directly from the website. Users may determine the current map date for each FEMA panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information Exchange.

Communities assessing land on adjacent FEMA panels must obtain a current copy of the adjacent panel as well as the current FEMA data. These may be ordered directly from the Map Service Center at the number listed above.

For community and countywide map data refer to the Flood Insurance Study report for this jurisdiction.

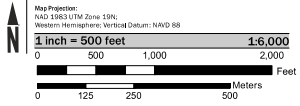

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-368-5647.

Base map information shown on this FEMA was derived from digital orthophotography. Data were provided in digital format by Maine Office of GIS (MEOGIS). Orthorectification was acquired between 2003 and 2005 at a resolution of 1 inch = 240 feet.

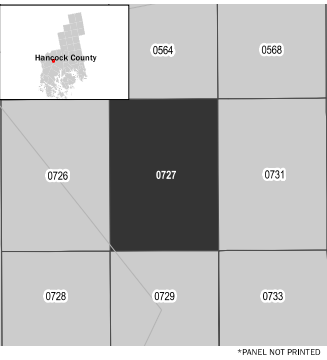

Only coastal structures that are certified to provide protection from the hyperextended chance flood are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FEMA database in S. 240, 2400.

State of Maine Floodway Note: Under the Maine Floodway Statutes Annotated (M.R.S.A.) Title 26 § 426A, 7C where the floodway is not designated on the Flood Insurance Rate Map, the floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the floodway, as measured from the normal high water mark to the upland limit of the floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved FEMA mapping methods.

For information and questions about this map, available products associated with this FEMA including historic versions of the FEMA, how to order products or the National Flood Insurance Program in general, please visit the FEMA Map Information exchange at <http://www.fema.gov> or visit the FEMA Map Service Center website at <http://msc.fema.gov>. Available products may include previously issued Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or obtained directly from the website. Users may determine the current map date for each FEMA panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information exchange.

Communities seeking land on adjacent FEMA panels must obtain a current copy of the adjacent panel as well as the current FEMA data. These may be ordered directly from the Map Service Center at the number listed above.

For community and countywide map dates refer to the Flood Insurance Study report for this jurisdiction.

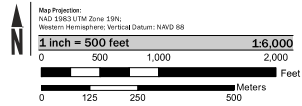

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-354-7629.

Base map information shown on this FEMA was derived from digital orthophotography. Data were provided in digital format by the Office of Geospatial Information (OGI). Orthorectification was acquired between 2003 and 2005 at a resolution of 1" = 144' cell size.

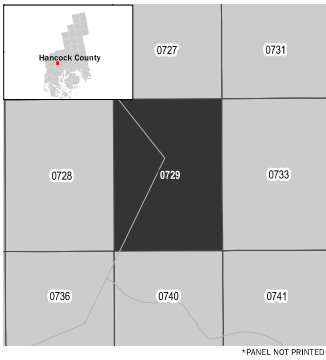

Only coastal structures that are certified to provide protection from the hyperconcentrated channel flow are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FEMA database as S, C, or D structures.

State of Maine Floodway Note: Under the Maine Floodway Statutes Annotated (M.F.S.A.) Title 30 § 431A, FC where the Floodway is not designated on the Flood Insurance Rate Map, the Floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the Floodway, as measured from the normal high water mark to the upland limit of the Floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved FEMA mapping methods.

NOTES TO USERS

For information and questions about this map, available products associated with this FIRM including historic versions of this FIRM, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information Exchange at 1-877-336-2672 or visit the FEMA Map Service Center website at <http://msc.fema.gov>. Available products may include previously issued Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or obtained directly from the website. Users may determine the current map date for each FIRM panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information Exchange.

Communities assessing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM data. These may be obtained directly from the Map Service Center at the number listed above.

For community and countywide map data refer to the Flood Insurance Study report for this jurisdiction.

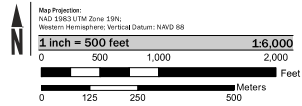

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-354-2629.

Base map information shown on this FIRM was derived from digital orthophotography. Data was provided in digital format by the Maine Office of GIS (MEOGIS). Orthorectification was acquired between 2003 and 2005 at a resolution of 1 inch to 1 foot scale.

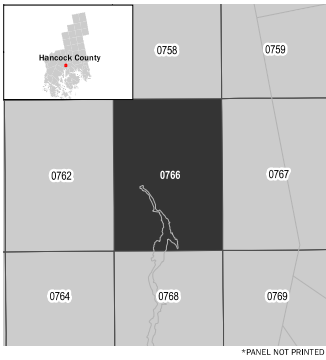

Only coastal structures that are certified to provide protection from the hyperconcentrated channel flow are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FEMA database as 5' and 10' structures.

State of Maine Floodway Note: Under the Maine Floodway Statutes Annotated (M.R.S.A.) Title 36 § 436A, 7C, where the floodway is not designated on the Flood Insurance Rate Map, the floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the floodway, as measured from the normal high water mark to the upland limit of the floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved FEMA mapping methods.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-456-3426.

Base map information shown on this FIRM was derived from digital orthophotography. Data were provided in digital format by the Office of Geographic Information Systems (GIS). Orthorectification was completed between 2003 and 2005 at a resolution of 1 inch to 100 feet.

The AE Zone category has been divided by a Limit of Moderate Wave Action (LIMWA). The LIMWA represents the approximate boundary line of the 10-foot breaking wave. The effects of wave heights between the VE Zone and the LIMWA (or between the shoreline and the LIMWA for areas where VE Zones are not identified) will be similar to, but less severe than those in the VE Zone.

Only coastal structures that are certified to provide protection from the hyperconcentrated channel flood are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FEMA database in 5' contour. Under the Maine Revised Statutes Annotated (M.R.S.A.) Title 30 § 430A, PC where the floodway is not designated on the Flood Insurance Rate Map, the floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the floodway, as measured from the normal high water mark to the upland limit of the floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved FEMA mapping methods.

### NOTES TO USERS

For information and questions about this map, available products associated with this FEMA including historic versions of the FEMA, how to order products or the National Flood Insurance Program in general please call the FEMA Map Information Exchange at 1-877-FEMA-MAP (1-877-368-2677) or visit the FEMA Map Service Center website at <http://msc.fema.gov>. Available products may include previously revised Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or utilized directly from the website. Users may determine the current map date for each FEMA panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information Exchange.

Communities assessing land on adjacent FEMA panels must obtain a current copy of the adjacent panel as well as the current FEMA letter. These may be ordered directly from the Map Service Center at the number listed above.

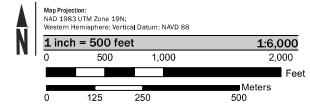

For community and countywide map date refer to the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-368-5647.

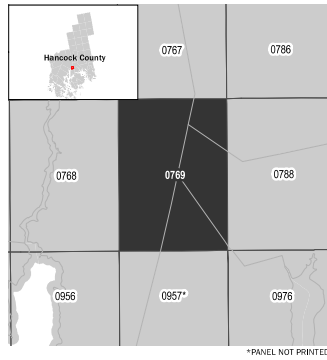

Base map information shown on this FEMA was derived from digital orthophotography. Data were provided in digital format by Maine Office of GIS (MEGIS). Orthorectification was acquired between 2003 and 2005 at a resolution of 1" and 24" cell size.

Only coastal structures that are certified to provide protection from the hyperinundated channel flood are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the FEMA database in 5' contour. Under the Maine Revised Statutes Annotated (M.R.S.A.) Title 36 § 436A, PC where the floodway is not designated on the Flood Insurance Rate Map, the floodway is considered to be the channel of a river or other water course and the adjacent land areas to a distance of one-half the width of the floodway, as measured from the normal high water mark to the upland limit of the floodway, unless a technical evaluation certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved FEMA mapping methods.

For information and questions about this map, available products associated with this FIRM including historic versions of this FIRM, how to order products or the National Flood Insurance Program in general, please visit the FEMA Map Information eXchange at <http://www.fema.gov/mie> or visit the FEMA Map Service Center website at <http://www.fema.gov/mfsc>. Available products may include previously issued Letters of Map Change or Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or utilized directly from the website. Users may determine the current map date for each FIRM panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information eXchange.

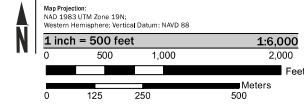

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-368-5848.

For community and countywide map date refer to the Flood Insurance Study report for this jurisdiction.

The AE Zone category has been divided by a Limit of Moderate Wave Action (LIMWA). The LIMWA represents the approximate likelihood of a 1% annual chance wave. The effects of wave heights between the VE Zone and the LIMWA (or between the shoreline and the LIMWA for areas where VE Zones are not identified) will be similar to, but less severe than those in the VE Zone.

Only coastal structures that are certified to provide protection from the "unrestrained hazard flood" are shown on this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and mapping are present in the DFIRM database in S, C, and D, and E, and F, and G, and H, and I, and
